

## Basic HSA Preventive Drug List

Preventive drugs are used to help avoid disease and maintain health. If your employer offers a high deductible health plan that is intended to be paired with a Health Savings Account (HSA), you will be able to purchase the medications on the preventive drug list for a copay, rather than having to pay the full cost of the drug up to your plan's deductible. The preventive drug list was developed in accordance with federal guidance and is a subset of the HealthPartners drug formulary. This list is reviewed periodically and is subject to change, so be sure to review the most current list before filling your prescriptions.

Check your plan details or ask Member Services if you have this benefit

**Please note:** *If there is a difference between this general information and your plan documents, your plan documents will be used to determine your coverage. Please see your plan documents for your specific coverage information.*

### How to use this list

- The following list explains which medications are covered as HSA Preventive medications
- Brand medicines are in ALL CAPS (e.g., JARDIANCE TABLET)
- Generic medicines are in lower italics (e.g., furosemide tablet)

### Other important information

- Coverage rules may apply and may not be shown here.
  - » Some medications have rules, such as prior authorization, that must be met before the medication is covered.
  - » Please see the "More Details" column below for more information.
  - » Please check the **Pharmacy Drug List (Formulary)** for complete coverage rules.

PA - Prior authorization

ST – Step therapy

QL – Quantity limit

AE – Age Edit
